Light Curtains

December is a time for wrapping up. We've done a lot this year and wouldn't be here without our team and You - Our Customers. We have many things planned for next year, so watch this space. Wishing everyone a Merry Christmas and wonderful New Year!

Wow, what a year that was...

We have expanded our team with exceptional new talent to compliment our vastly experienced long term staff.

We are sure these new faces will continue to provide the excellent service you are already receiving.

## Staff Insight: Polina Peneva

Polly joined in August as our new Sales Administrator. Polly has many years of customer service experience in her previous roles and is passing this knowledge onto our existing staff.

Polly the self confessed "social butterfly" loves socialising and visiting a variety of festivals.

If you are tight for space or require an IP54 rated Car Top control, look no further than our CTC21.

It comes fitted with 3 hour Emergency LED back up as standard.

With compliant symbols on the pushbuttons and an RCD socket meeting current EN81 requirements.

The CTC21's angled base plate ensures it also complies with BS7255.

This base can also be removed so you can mount it onto a hand rail or mounting panel.

As with all of our other car top models, extra contacts are available to order.

Contact our sales office with your requirements.

## VEGA B-LIFT SERIES

Introducing Vega light curtains to our ever expanding portfolio of quality products. We now stock a range of Vega safety edges, with 7mm and 10mm profiles. All come with direct connection plugs and a power supply. The power supply comes fitted with contact blocks. We have an edge for all of your budget requirements.

When they are gone they are gone.  
Last of our ever popular 2G GSM unit.  
One off orders are just £100+vat. Bulk order prices available.
