# Switch Monitored Ladder Bracket Fixing Instructions

## Side view Stowed

- Please use the two fixings provided to mount this bracket. These are universal fixings and can be used on multiple surfaces. Substitute fixings may not be suitable.
- Please ensure that the ladder bracket is mounted at a sufficient height to enable the ladder to hang normally on the bracket arm, thus depressing the safety switch, when stowed.
- Please ensure that the ladder is replaced on the bracket after use.

## Front View

**Safety Switch**  
Lift disabled when ladder  
is removed from bracket

**Cat No. HLB1**
